RELEASE

Structural Plastics Conference, Vancouver, March 26 to 28

The Structural Plastics Division of the Society of the Plastics Industry Inc. held its annual technical conference and parts design competition for the first time on Canadian soil this year. The design competition evaluates entries in 17 different categories. The award-winners this year included Canadian-based FGL Precision Works, Ltd.

1. The Conference Award and Building & Construction Award went to FGL Precision Works Ltd. for a structural road mat molded by Loma Company (see cover story, p. 27). FGL's vice-president Tom Meisels says FGL built 24 sets of the giant tools for Loma from aircraft aluminum.
